WE PRODUCE ALUMINIUM MOTORIZED RETRACTABLE LOUVERED PERGOLA.

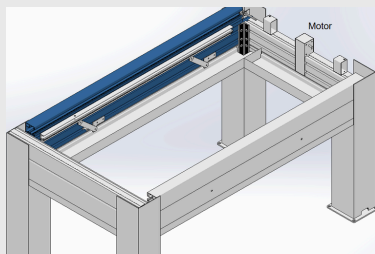

(MANUAL CONTROL AS OPTIONAL)

WHY CHOOSE US? WHY CHOOSE US?

1

**24V SAFE VOLTAGE
/120W LOW POWER.**

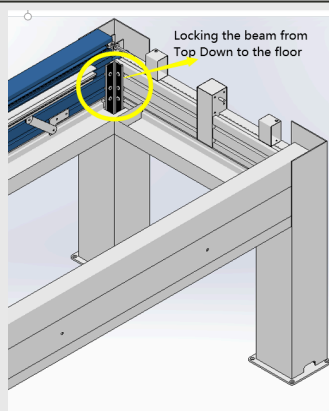

Safe and easy for electrician approval.

2

**USE ONLY ONE SINGLE
SERVO MOTOR.**

No Lag, No Jamming, Worry-Free Maintenance.

3

**SMART AUTO-PAUSE: INSTANTLY
RESPONDS TO ANY LAG, WITH
AUTO ADJUST MOTOR PROGRAM.**

Avoids harm, and Auto-resumes once normal conditions return.

WE PRODUCE ALUMINIUM MOTORIZED RETRACTABLE LOUVERED PERGOLA.

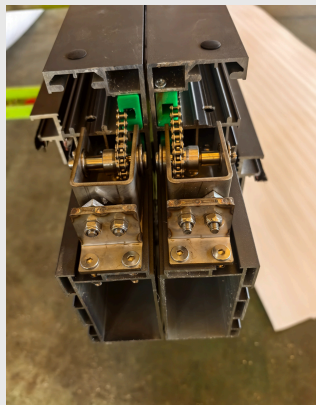

(MANUAL CONTROL AS OPTIONAL)

WHY CHOOSE US? WHY CHOOSE US?

4

**STAINLESS STEEL DRIVE SHAFT
(NOT AN ORDINARY PLASTIC
BELT DRIVE)**

Stable, Heavy-duty design. Prevents belt overheating and peeling.

5

**HIGH QUALITY HARDWARE
AND PATENTED STRUCTURE
DESIGN.**

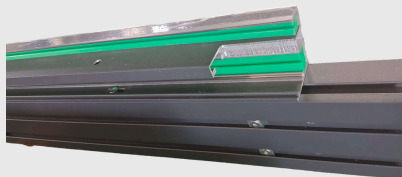

Quiet Operation.

6

**ALL-LOCKING SCREW DESIGN
WITH REINFORCED
COMPONENTS PRE-EMBEDDED**

Save the labour cost.

WE PRODUCE ALUMINIUM MOTORIZED RETRACTABLE LOUVERED PERGOLA.

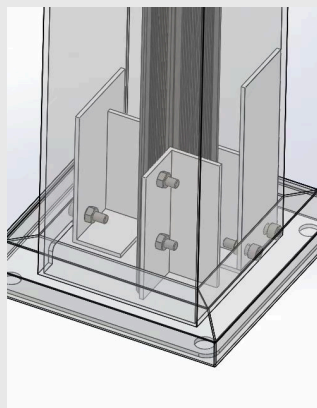

(MANUAL CONTROL AS OPTIONAL)

WHY CHOOSE US?

7

THE COLUMN IS REINFORCED FROM THE BASE TO THE TOP AND TIGHTLY LOCKED WITH THE BEAM

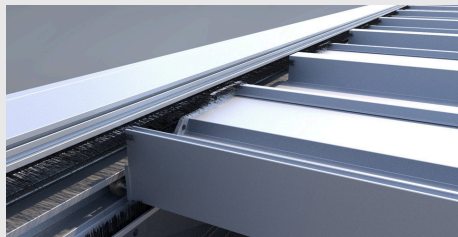

Featuring premium materials, a patented connection structure design, and outstanding stability
Snow Loading / Wind Resistance Approval.

8

BETTER ENCLOSURE ON ROOFING

All-weather Suitability.

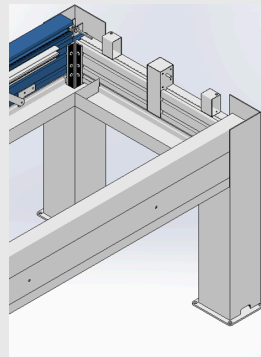

9

ADVANCED WATER GUTTER & POST DRAINAGE

upgraded gutters and raised barriers—no leaks from louvers

Our water gutter size: 122x75mm
comparing with other: 58x66mm

WHY CHOOSE US?

OUR KEY ADVANTAGES - MOTOR & WATERPROOF

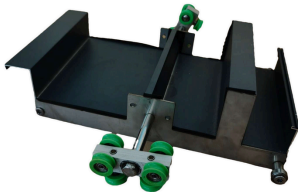

OUR motor automatically learns its travel path, requiring no adjustment. It stops upon encountering any obstacles, ensuring safety without worry. One single 24V Low-voltage Servo motor.

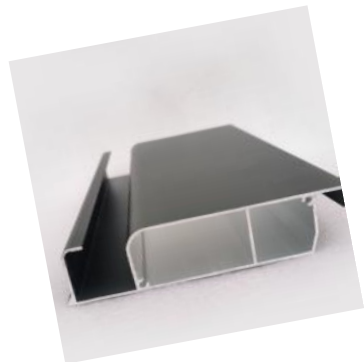

OTHER motors on the market require adjustment of their travel path, which is time-consuming, and lack the feature of stopping immediately upon encountering obstacles.

1 SINGLE MOTOR VS. MORE MOTORS

OUR multi-level drainage ensures rapid water going and prevents leakage. Louvre **1.6 mm** thickness, comparing with other's **1.0mm** thickness

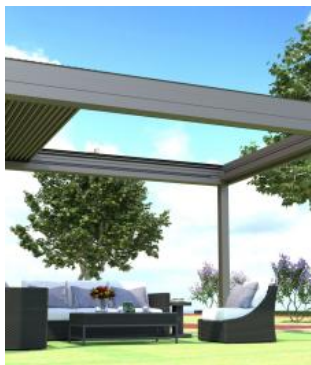

OTHER drainage is simple, cause slow water going, which can easily result in a situation where "it's pouring outside, but drizzling inside."

WATERPROOF VS. LEAKING INSIDE

WHY CHOOSE US?

OUR KEY ADVANTAGES- QUICK-BUILT & SILENT

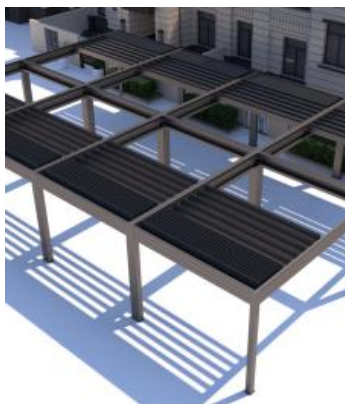

Our pergola Installation is simple with modular assembly, allowing for easy completion and saving labor time.

Installation from other factory is complicated, requiring on-site drilling. Even a slight mistake can result in installation failure.

QUICK-BUILT VS. ONSITE ASSEMBLY

When closed, it provides protection against rain, snow and falling objects. When opened, it allows for stargazing, moon viewing and sunbathing.

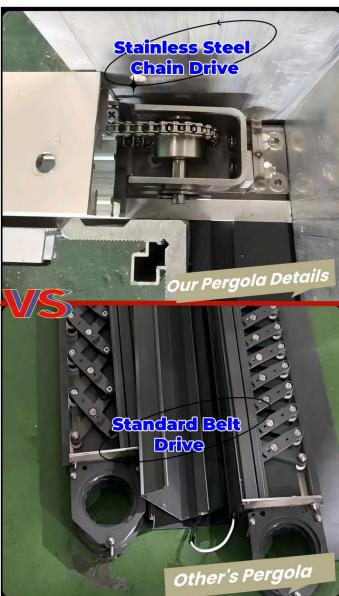

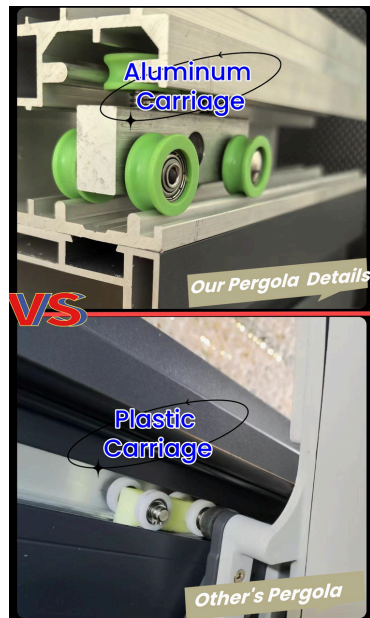

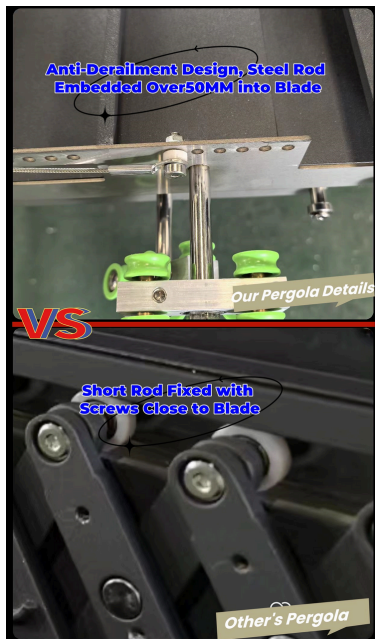

The linkage is with rubber belt, resulting in a noisy running.

**SILENT AND SMOOTH VS. NOISY OPERATION
STRUCTURE**

WHY CHOOSE US?

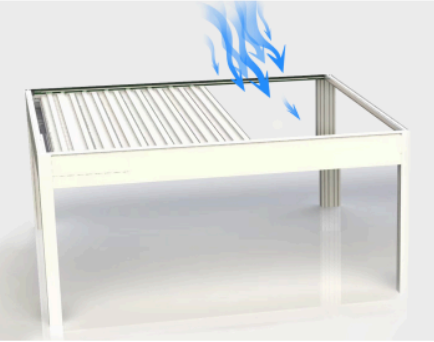

MORE STRUCTURAL ADVANTAGES

WHY CHOOSE US?

SUPERIOR PERFORMANCE – VENTILATION & LOADING

Our Pergola

Can open the roof easily by remote control

Ventilation

VS.

Other Pergola

The blades are usually not stacked

Our Pergola

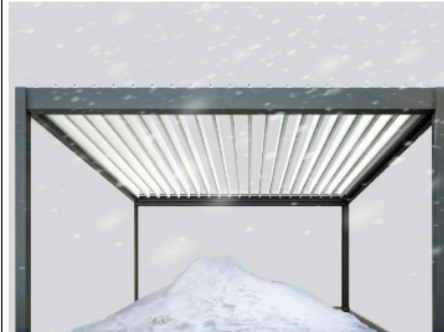

Withstand heavy snow loads.No need open the roof.

Snow Loading

VS.

Other Pergola

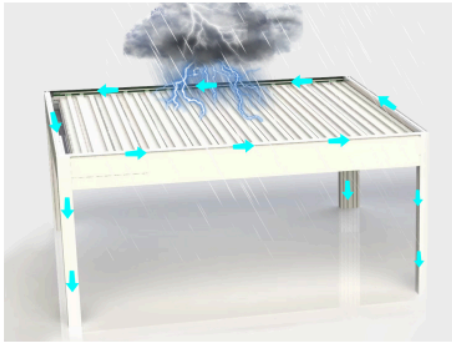

Need to open the blades to avoid the heavy snow loading.

WHY CHOOSE US?

SUPERIOR PERFORMANCE- WATERPROOF & BLADES

Our Pergola

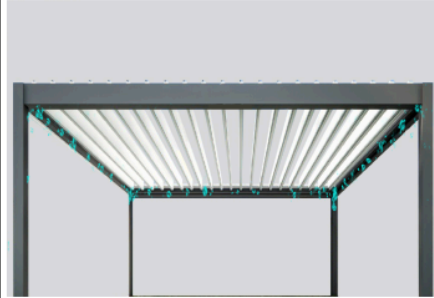

**100% water collected by special gutter
design, no leaking on heavy raining day**

Waterproof

VS.

Other Pergola

Rain drops leaking from the blades gap.

Our Pergola

**Enclosed Large Blades, and Strong Frame
Design**

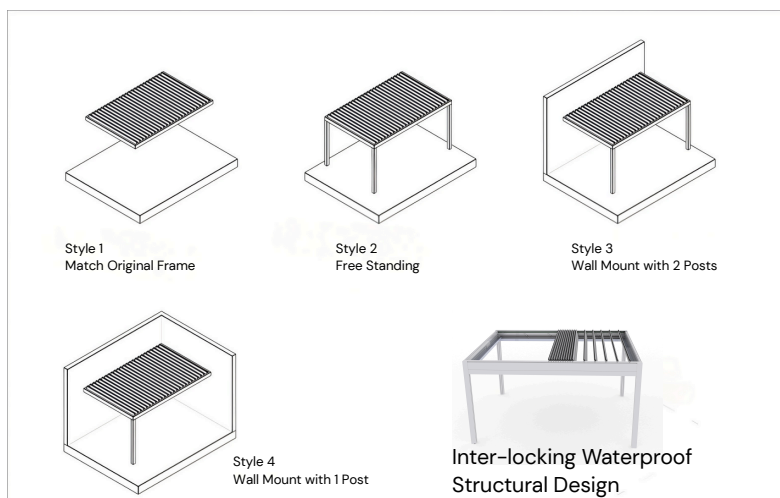

Blades

VS.

Other Pergola

Light and Small Blades

HOW TO CHOOSE ?

HOW IT WORK?

WHEN CLOSED

Compared to traditional PERGOLA, this model presents a more sleek and generous appearance, also exuding a more upscale and motorized advanced vibe.

ON OPENING

The blades are angled for optimal ventilation up to 70 degree.

The blades can be opened or folded, offering a broader view and enhanced airflow, overcoming the traditional limitations of enclosed sunshades.

WHEN FLODED

When folded, the blades automatically move to a fixed position.

Besides the conventional shading function of large louvers, they can also fold and retract to one side, not occupying any space at all.

WHAT ARE THE BENEFITS?

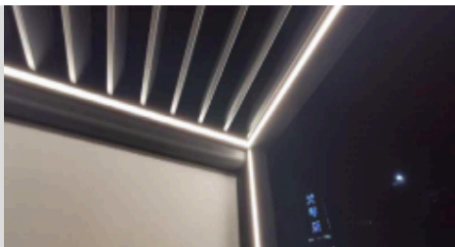

Spacious

This type of retractable flip-board waterproof louver pavilion offers a large space, not only providing people with a larger outdoor resting area but also the stacked blades allow for a wider field of view.

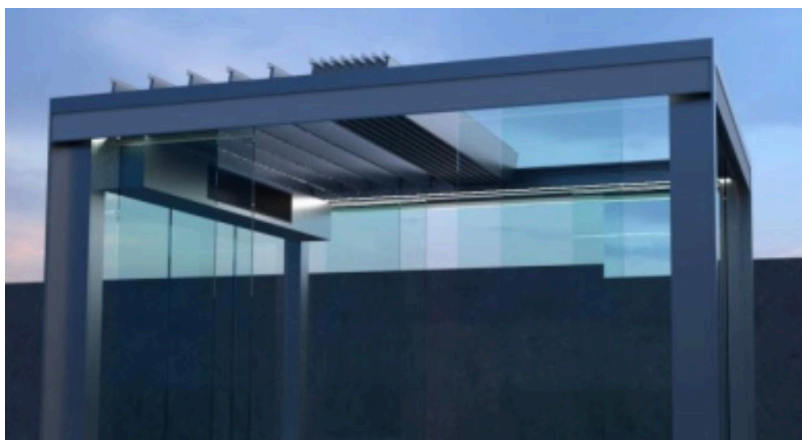

Flexible DIY Combination

Around the PERGOLA, you can also install glass doors, louvered doors, windproof roller blinds, lift-up windows, aluminum alloy outdoor cabinets, aluminum screens, and other compatible products.

For All Weather

The retractable flip-board waterproof louver PERGOLA is constructed with an aluminum frame and double-layer blades; it features high hardness, corrosion resistance, sturdiness, durability, rain protection, and sun protection.

ABOUT US

EGD OUTDOOR ALUMINIUM BUILDING MATERIALS FACTORY (EGD)
---ROOTED IN A LEGACY OF CRAFTSMANSHIP PASSED DOWN THROUGH GENERATIONS.
WITH A FOUNDATION IN THE ALUMINUM MATERIALS INDUSTRY DATING BACK TO OUR PARENTS' ERA MORE THAN 30 YEARS AGO, WE HAVE INHERITED A DEEP UNDERSTANDING AND APPRECIATION FOR ALUMINUM PROCESSING.

Located in Dali Town, China, our workshop spans 20,000 sqm and specializes in aluminum shading products known for their durability and performance. Our commitment to innovation and quality is evident in our range of louvered pergolas and building facade shading solutions.

In 2015, we introduced cutting-edge technologies to our outdoor aluminum profiles, launching the E-GARDEN series of electronic garden products. This line, under the E-GD brand, includes innovative solutions like flip-stackable pavilions and solar-powered carports.

Building on the foundation laid by our predecessors, we continue to uphold a tradition of excellence in providing premium shading solutions that seamlessly blend beauty and functionality, setting new standards for outdoor living spaces.
